Merlin M802

Programming Guide

Genuine M802

Programming Your Remote Control

1 Remove the front cover from your existing remote control, as well as the cover on your new remote control
2 Simply copy the 12 dipswitch combination from your old remote to your new remote control
3 Refit the covers and your new remote control will be ready for use!

Changing The Code In Your Motor

1 Remove your motor from power and remove the motor cover.
2 Inside will be 12 dipswitches, similar to your remote control. Change them to any new combination.
3 Copy this code to your remotes and the code will be changed!

For technical support, see our website below.
Please have the model number of your remote control and garage / gate opener before calling.
